

- Annotation Systems -

Annotations (Tags) are commonly used tools to describe and identify data. Many Web 2.0 applications are enabling their users to annotate content. Based on the research of Agosti [Agosti, 2007] different kind of Annotations can be identified.

Your work is based on current research and shall identify how different Web 2.0 applications (Flickr, Youtube) make use of annotations.

Regarding this topic several different approaches can be done

- *) Identify what kinds of annotations are used by different (Web 2.0) applications.
- *) Describe how a system combining different kind of annotations can be achieved.
- *) Find and compare a wide set of annotation tools regarding the specifications of Agosti.

Further information you need to know:

- write in English/German

[Agosti, 2007] ... Maristella Agosti and Nicola Ferro. A formal model of annotations of digital content, ACM Trans. Inf. Syst, Volume 26, 2007.
